Features and Benefits of titanium Blue-Line Instruments

LIGHT WEIGHT

- 45% lighter than stainless steel instruments.
- enables tireless working for the surgeon for long operations under the microscope
- offers permanently high precision to the operating surgeon and may therefore reduce traumatization of delicate vessels and arteries

ANTIMAGNETIC

Titanium is an antimagnetisches Material. It avoids sticking of the needle holder to the stainless suture needles. This allows an optimal, secure and continuous working.

NO RUST - LONG LIFE

Titanium- material and instruments does not rust.
You will never have problems with rust.

MAINTENANCE / CLEANING

Titanium instruments are principally very easy to clean and maintain. Titanium instruments may be cleaned with usual detergent for surgical instrument. Please rinse the instrument after use. Herefore we recommend especially for all Micro instrument and Diamond knives our steam cleaner unit item no. ST 9000. On request we offer you cleaning fluid for the instrument too. Before sterilisation we recommend to oil the surgical instrument with our „STERISOFT“ item no. OL 5000.

Vorteile und Nutzen Features and Benefits

DAUDJEE TITANIUM NEEDLEHOLDER WITH MULTI-LOCK SYSTEM MICRO NEEDLE HOLDER-ONE FOR TWO

DAUDJEE Multi - Lock needle holder can be used with lock or without lock. The removable lock allows a surgeon intraoperative changing of the lock system. For example when the nurse handles the suture with the closed lock, the surgeon can remove the lock during operation easily. Or one surgeon likes to work with lock and the other one without lock. DAUDJEE Multi-Lock System gives you these opportunities. No-lock problems with an easy and secure closing mechanism

DIAMOND DUSTED

Finest metallurgically bonded particles create a fine atraumatic surface for extremely atraumatic handling of tissues and suture.

For example: -diamond dusted forceps are optimal for fine atraumatic fixation of tissue, micro vessels and fine delicate suture for knitting.
- diamond dusted DAUDJEE microneedle holders allow you to use suture up to most delicate suture.

Latexfrei
Latex free

Vascu-Loops reduzieren Verletzungen an den Gefäßen bei Occlusionen, besonders da wo eine blutstillende Klemme eingesetzt wird. Die fadenähnlichen atraumatischen Vertiefungen erlauben sanfte, konstante und rutschfeste Spannung.

- medizinisches Silikon
- drei Farben
- zwei 5" Längen pro steriler Beutel
- Röntgenfähig
- Auch un-steril erhältlich
- latexfrei

Vascu-Loops reduce trauma to vessels requiring occlusion, particularly where a hemostatic clamp is employed. The tread-like indents allow for gentle, constant, and non-slip tension.

- Medical-grade silicone
- Three colors
- Two 5" lengths per sterile pouch
- Radiopaque
- Also available non-sterile
- Latex free

ENGLISH

ACHTUNG
Sämtliche chirurgische Instrumente dürfen ausschließlich im Verhältnis zur Bauart eingesetzt werden, z.B. dürfen feine Schere nur zum Schneiden von feinstem Gewebematerial eingesetzt werden. Scheren dürfen nicht zum Schneiden von harten Materialien, insbesondere Kalk, verwendet werden. Asanus übernimmt keine Gewährleistung für alle auftretenden Schäden durch unsachgemäße Handhabung der Instrumente.

ATTENTION
All surgical Instruments may be used only in accordance with its purpose. For example delicate scissors may be not used to cut hard materials like calcium deposits or plaque etc.. If a user is not sure for handling Asanus surgical instruments he has to ask Asanus for the correct usage. In case of wrong handling of the Asanus surgical products Asanus cannot take any warranty.

Daud Jee Mfg. Co
